

**LEED** ADVANCED  
**GREEN** STUDIES  
**DESIGN** WORKSHOP

**Overall goal:**

This workshop is intended to promote awareness among students and professionals interested in developing sustainable interior design practices in residential and commercial interior spaces.

**Workshop requirements:**

- Students will research sustainable materials and new energy trends. (2–3 Hours per week of work outside of class)
- Each student will develop their own project which will be presented in the final class.
- Classes meet 3 hours per week.
- Students will participate in two field trips to visit buildings which demonstrate opposing poles in green design.

(Note that this workshop is not a preparatory workshop for the LEED AP exam.)

**Supplies:**

- Notebook to take notes in class
- Digital camera
- 3 boards 24X 18 for the last class presentation
- Drafting experience is helpful but not required
