

CONTINUING EDUCATION TESTIMONIALS

3DS Max

"The instructors I have met at the Art Institute of Colorado are exceptional. They not only understand the subject matter (3D studio Max), they are great teachers. I've been in many seminars over the years learning new advances in CAD systems. Art Institute of Colorado is able to use instructors that have actual working experience and they can relate the experience to their students. I have learned so much in the three seminars that I have attended at the Art Institute. I have had three national finalists in the last three years at the National SkillsUSA Contest. These students all have told me how invaluable the seminars have been to them. I would and have recommended this school to many students. I currently have one student attending and three more on their way."

DVD Studio Pro Training

"I just wanted to let you know that I really got a lot out of the two day DVD Studio Pro training. Brenden Boykin is one of the best instructors I've had for a class like this. He really knows his stuff and is able to make it understandable to others. I hope to return sometime this winter for a Final Cut Pro class."

Dave

Final Cut Pro

"I just want to thank you for your part in creating such a great professional development program at the Art Institute of Colorado. I spent a lot of time online searching for a course in Final Cut Pro - your level of professionalism and your scheduling flexibility were deciding factors in choosing the Art Institute. The Final Cut Pro 200 course exceeded my expectations. Brendan Boykin is extremely knowledgeable in the field, and his personal work experience brought so much to the class. Brendan also knows how to present complex material in a way that students can clearly understand, which is a real gift. I came away from the class not only with an vastly improved knowledge of Final Cut Pro and with an Apple Certification, but also with a clarity and confidence that only comes from a high level of instruction. Thanks for creating such a rewarding learning experience."

Sara
Assistant Professor of Art

InDesign

*"Feedback from both class groups is fantastic. Mark is a great instructor and I would hope to utilize his expertise again. Let us have some time to work with the software, then I will get back to you for a possible follow-up for all or some of my department.
Again, my thanks for both your help in making this happen and the pleasure of your company at lunch."*

Michele
Creative Director

"The class was wonderful! The other ladies and I are still raving about Linda's knowledge and what she shared with us. What a wonderful Continuing Education program you have developed! I wish I would have set it up for a 2 day class because I felt that we could've covered even more. We are already looking into taking more of Linda's regularly scheduled classes and/or other classes at the Art Institute. Thank you so much for your time and energy!"

Christy
Assistant Designer

Web Site Design

"I just wanted to say thanks for your guidance and support during the CE web class. I gained a tremendous amount of knowledge from the class and am looking forward to using this experience to refocus my career."

Mike

Advanced Web

"About four weeks ago I finished up a class with Walter Breakell. I wanted to send my comments onto you acknowledging Walter's great insight in the Multimedia and Web industry. I thoroughly enjoyed every minute of the curriculum. Walter challenged me in ways that have strengthened my skills and added confidence to my design future.

I particularly enjoyed how Walter took time to understand my goals and status. He understood my ambitions and facilitated growth.

Should I find another opportunity to do so, I will look forward to learning more from Walter. Thank you for the opportunity!"

Doug
AIC Alumni 1999

After Effects

"Mark and I had an excellent first meeting. He is the instructor I imagined when I signed up for this course. He answered my questions and introduced me to things I didn't know I didn't know.

It's also apparent to me that I'm more competent with these programs than I thought I was, but Mark is able to go beyond tool introduction to show me some actual techniques for applying the tools. He can also explain a lot of the "behind the scenes" stuff which I find both interesting and enlightening.

It's my opinion that Mark is an excellent resource and an asset to AI. I can't thank you enough for making this happen."
