

The Art Institute of Philadelphia Addenda

September 2009

PHOTOGRAPHY

Associate of Science & Bachelor of Science

Course deleted from the Photography Core Course Listing:

PH10221 View Camera

Course added to the Photography Core Course Listing:

PH10231 Fundamentals of Photography II

In this class students will expand upon the basic photographic tools and techniques such as ISO, light readings and lenses, introduced in Fundamentals of Photography. This course will also explore various artistic devices that contribute to an aesthetic interpretation of photography, including identification of photographic themes and styles. Students will be expected to utilize these skills to create images for a series of conceptually advanced projects/series oriented assignments to stimulate the student's capacity for personal expression, communication and self-understanding. Prerequisite: PH10130

(3 quarter credits, 4 hours per week)

FASHION DESIGN

Page 22
